

# JSP & servlet

## 10강\_JSP request, response

사용자의 요청(Request)과 web-server의 응답(Response)을 담당하는 객체에 대해서 학습합니다.

---

10-1 request 객체

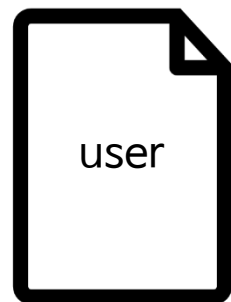

10-2 response 객체

## 10-1 : request 객체

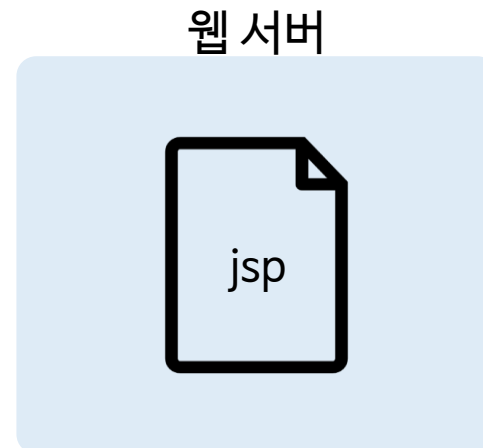

```
<form action="mSignUp.jsp" method="get">  
  user data  
  <input type="submit" value="sign up">  
</form>
```

Request

```
<%  
  m_name = request.getParameter("m_name");  
  m_pass = request.getParameter("m_pass");  
  m_gender = request.getParameter("m_gender");  
  m_hobby = request.getParameterValues("m_hobby");  
  m_residence = request.getParameter("m_residence");  
%>
```

Request

## 10-2 : response 객체
