

JSP & servlet

6강_Servlet request, response

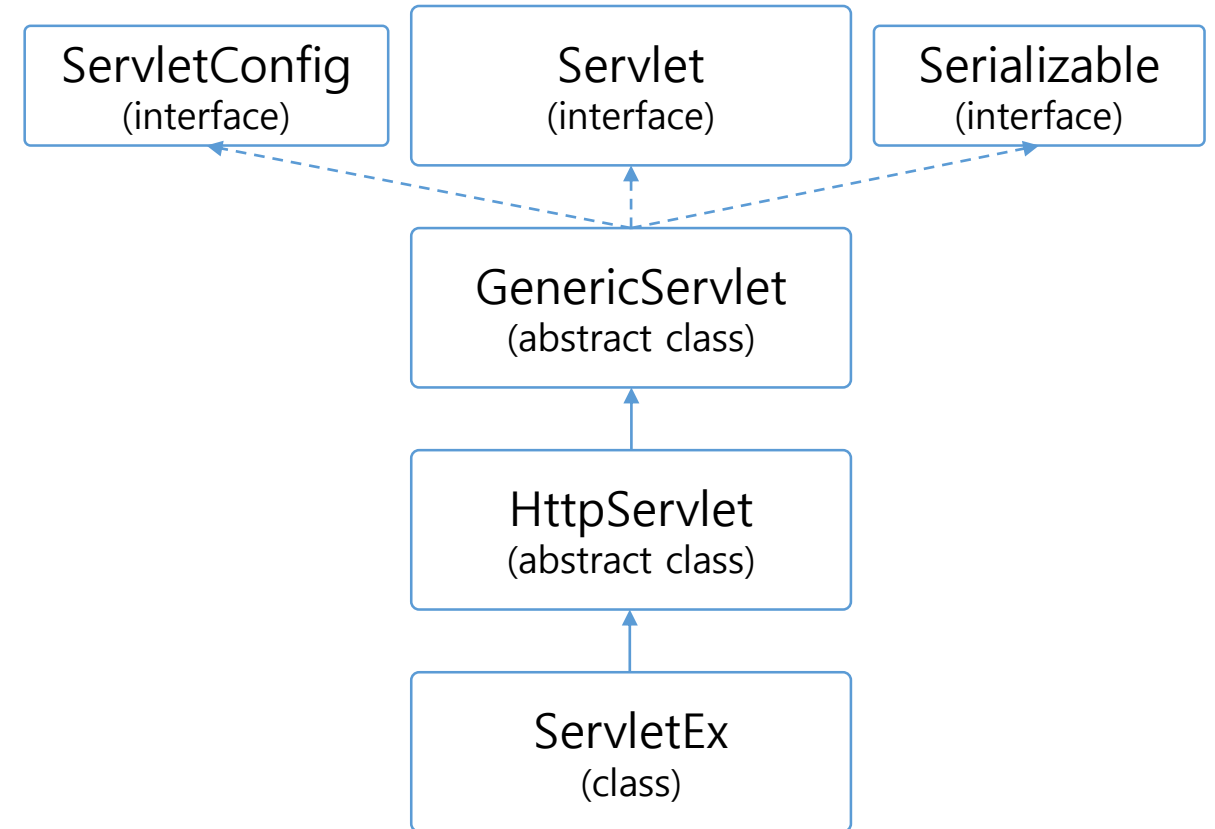

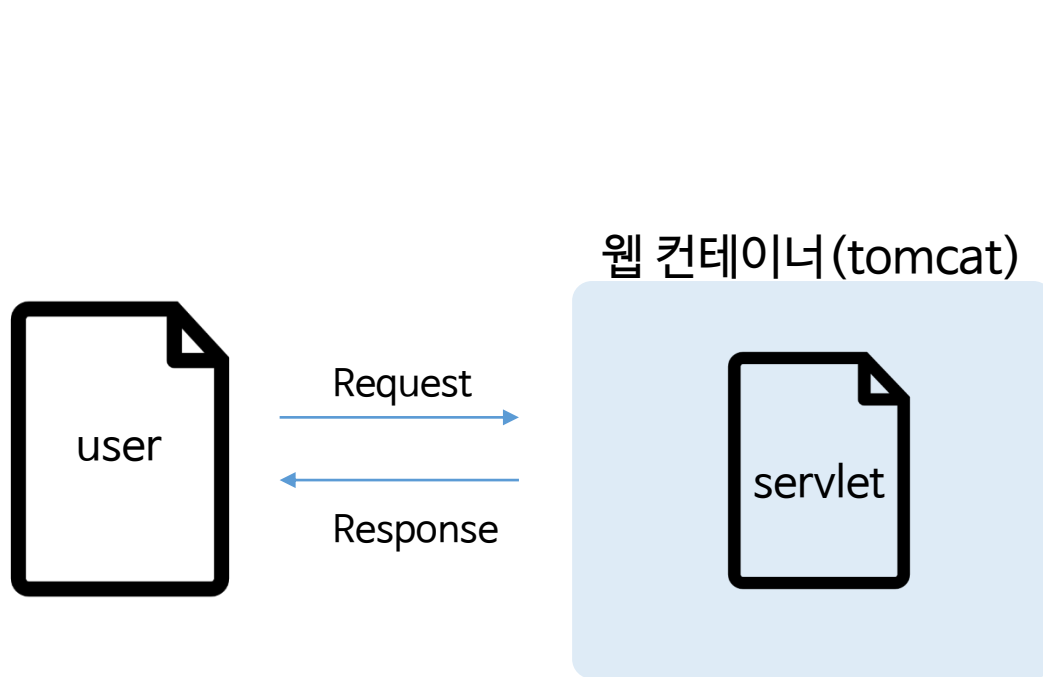

사용자의 요청(Request)과 web-server의 응답(Response)을 담당하는 객체에 대해서 학습합니다.

6-1 HttpServlet

6-2 HttpServletRequest

6-3 HttpServletResponse

6-1 : HttpServlet

6-1 : HttpServlet

```
package com.servlet;

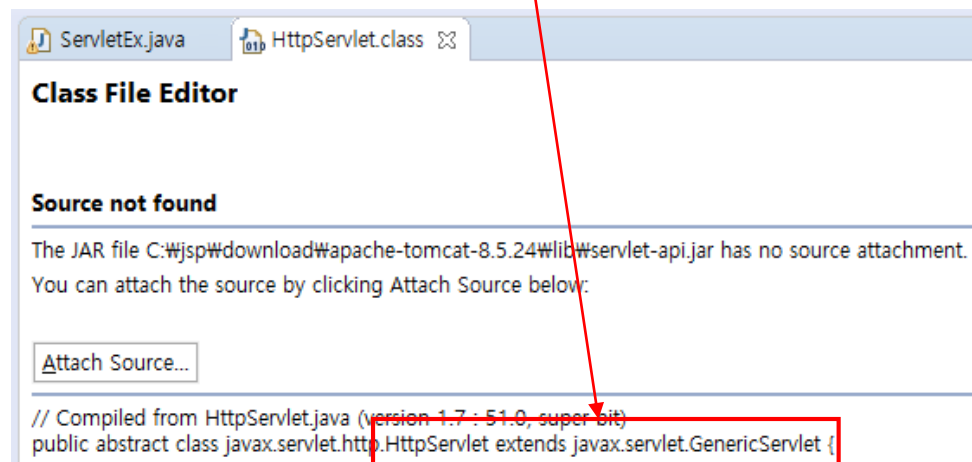

@WebServlet("/SE")
public class ServletEx extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {

    }

    protected void doPost(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
        doGet(request, response);
    }

}
```

6-2 : HttpServletRequest

```
package com.servlet;

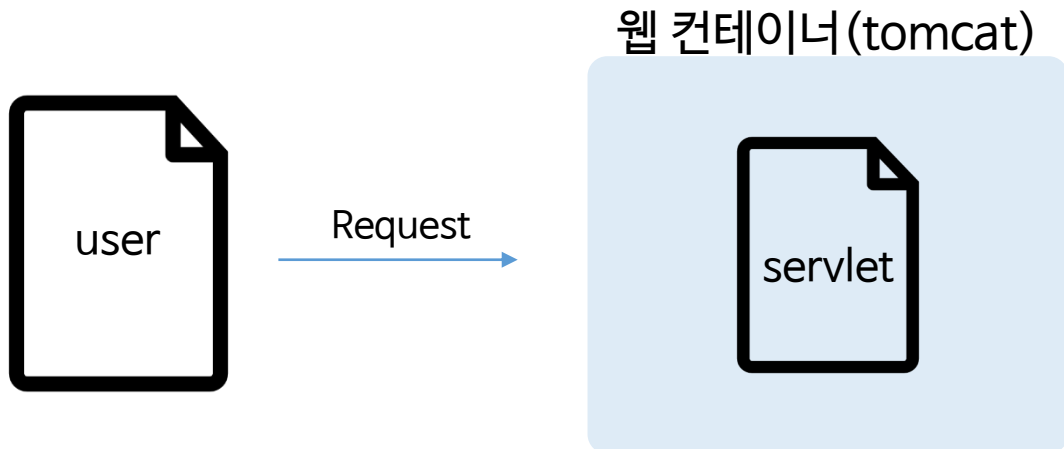

@WebServlet("/SE")
public class ServletEx extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {

    }

    protected void doPost(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
        doGet(request, response);
    }

}
```

HttpServletRequest

요청에 대한 정보를 가지고 있는 객체

```
request.getCookies();
request.getSession();
request.getAttribute(null);
request.setAttribute(null, null);
```

```
request.getParameter(null);
request.getParameterNames();
request.getParameterValues(null);
```

6-3 : HttpServletResponse

```
package com.servlet;

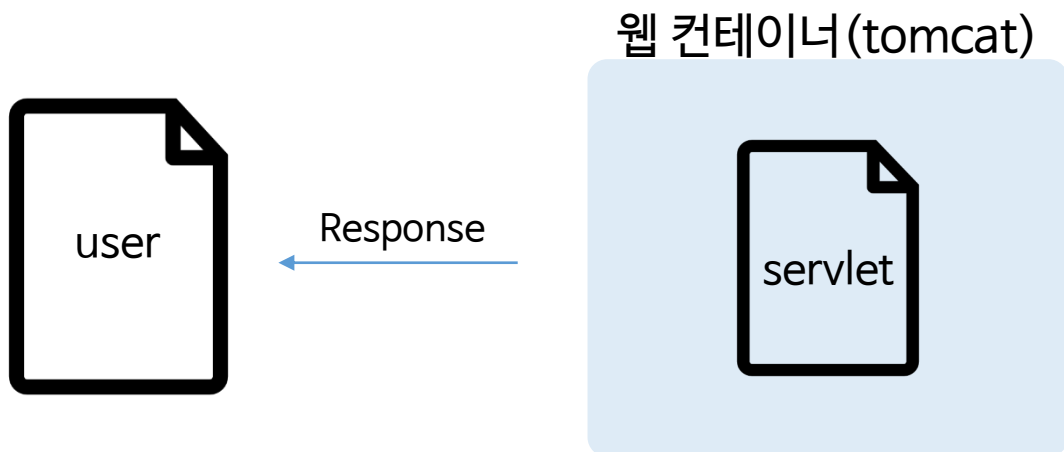

@WebServlet("/SE")
public class ServletEx extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {

    }

    protected void doPost(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {
        doGet(request, response);
    }

}
```

HttpServletResponse

응답에 대한 정보를 가지고 있는 객체

```
response.addCookie(null);
response.getStatus();
response.sendRedirect(null);
```

```
response.getWriter();
response.getOutputStream();
```
